PROJECTS

Reactor

github.com/walkerrandolphsmith/reactor (github.com/walkerrandolphsmith/reactor)

Collection of React components managed with Yarn and Lerna. Developed with Storybook.

VersionOne.Planr

github.com/walkerrandolphsmith/VersionOne.Planr

(github.com/walkerrandolphsmith/VersionOne.Planr)

Web application that facilitates 3 amigo sessions. Assets are synced with a VersionOne instance while providing enhanced micro-interactions to create acceptance criteria with Gerkin style semantics.

Roku Remote

github.com/walkerrandolphsmith.com/roku-remote

(github.com/walkerrandolphsmith.com/roku-remote)

React Native application to control one or more Rokus from your Android, iPhone or tablet.

Yolo

github.com/walkerrandolphsmith.com/yolo (github.com/walkerrandolphsmith.com/yolo)

Android application that allows parents to get informed when their child is in a vehicle so they can choose to remotely lock the device with a one time password to help prevent texting while driving among teen drivers.
